

Food for Health

Are You What You Eat?

SUITCASE EXHIBITION

Food is a topic of endless discussion. It's something we can't do without and it can also be a source of great enjoyment. Is there anything as personal or as important as the foods we choose to eat each day? Our health depends to a large extent on what we eat.

The **Food for Health** table-top interactive exhibit, designed for elementary grades, teaches the role food plays in ensuring good health. It answers many of the questions Canadians have about their food choices, about food safety and about the role food plays in ensuring good health.

Components

- Four fold-out panels (English on one side, French on the other)
- MacBook Pro computer with the full contents of the Food for Health exhibition and website, as well as the exhibition's interactives, games and activities
