## **Google Street View™ visits the Canada Agriculture Museum, the Canada Aviation and Space Museum, and the Canada Science and Technology Museum**

OTTAWA, October 12, 2012 – Google Street View™ technicians are capturing the fascinating exhibitions on display at the Canada Agriculture Museum (CAgM), the Canada Aviation and Space Museum (CASM), and the Canada Science and Technology Museum (CSTM) this week.

The Google Street View™ technology used in the museums will enable web users of Google Maps™ to view images of the fascinating artefacts (such as farm animals, as well as vintage planes, locomotives, cars, and Canadian innovations and leading edge technologies) and exhibitions on display. Google Street View™ will not replace the real experience of a visit to the museums nor will it reproduce the dynamic live activities and presentations offered by the museums' creative and educational programming.

“We are very pleased to welcome Google Street View in our museums,” said CSTM CEO Denise Amyot. “This technology will help so many more Canadians access our collections and appreciate the wide variety of ways in which science and technology affect our everyday lives. We look forward to work with this technology and Google to further our education mandate and reach out to Canadians.”
